

Annual Report Template

About This Model Tool

As a matter of clarity, **authorizers should be aware** this document is a tool intended to inform stakeholders of a charter school's overall profile and not as a scored performance framework. One should note a performance framework is a group of scored metrics that result in overall ratings. A school profile is a collection of critical but unscored information and/or metrics about a school that can be widely shared alongside the rating of a school's performance and quality.

Report Components

The components in this report are a result of authorizer survey responses and feedback provided by Florida authorizers during a workshop held in January 2021. Each component can be customized to best serve districts' unique needs as well as stakeholder messaging. The intention of this tool is to provide Florida authorizers an annual report template to be used at their discretion.
